CONTAMINATION CONTROL FOR WORK SAFE ENVIRONMENTS

WHY DYCEM?

Our Dycem WorkSafe range will offer a supportive, proven addition to your current hygiene practices by offering you simple, long-lasting and effective solutions, for any risks faced from contamination entering your working environment.

With 50+ years of experience in the field of contamination control, our scientific-led Dycem solutions will offer added value to your practices on-site to support an ever-changing workplace.

ANTIVIRAL PROTECTION

Independently proven to support viral risk, including COVID-19 strain >97% in under 4 hour contact times.

PERFORMANCE/DURABILITY

Potential lifespan of up to 3-5 years, dependant on regularity of use.

WASHABLE SURFACE

Dycem has been specially researched and tested with various cleaning solutions, to ensure the longevity of your installation throughout its lifecycle.

Dycem contamination control flooring solutions are manufactured with Biomaster (a silver microbial) as an integral ingredient, providing effective and long-lasting antimicrobial protection.

Biomaster is proven to reduce the growth of harmful bacteria such as Campylobacter, MRSA, E.coli, Listeria, Salmonella and many others by up to 99.9%.

READY TO USE

Self-installed and are ready to use when unrolled.

BEHAVIOURAL

Perfect for adapting to social distancing practices through colours and design.

CUSTOMISABLE

Can be adapted into various shapes, sizes and colours.

ANTIMICROBIAL

Sheered with Biomaster Silver Ions to ensure contaminants are inhibited within the surface.

WARRANTY

All products are warrantied for 12 months, subject to normal usage, wear and tear.

ENVIRONMENTAL

Provide less waste pollution than the likes of its alternatives.

Inhibits bacterial growth

Supports strict microbial needs of various industries

2 in 1 protection - Antimicrobial, washable Contamination Control Mats and Door Push Pads to support a safer return to a working environment

Up to 75% prevention of airborne contamination

Better overstrike performance than alternatives and massive waste reductions

Up to 99.9% effective in preventing contamination

HOSPITALITY & CATERING

The hospitality and catering industry consists of a variety of services including food and drink preparation, accommodation amenities – such as hotels and corporate events.

By utilising Dycem Contamination Control Floor Mats and Push Pad systems, the hospitality and catering industry will enhance hygiene practices and implement duty of care that will allow focus on ensuring customer safety and expectations are met to the highest standards. Complying with guidance to control the spread of viruses and contamination.

Dycem Contamination Control Floor Mats and Push Pads improve the control of risk of contamination, viruses, and infections. Allowing the industry to follow practices to ensure they can continue to provide a service.

AREAS DYCEM BENEFITS

- ✓ Hotel Entry Zones
- ✓ Goods in Areas
- ✓ Kitchen/Catering Entrances /Exits
- ✓ Reception Areas
- ✓ Lift Access

CASE STUDY

Santika Indonisa, Hotel and Resorts

Due to the government implementations and restrictions, the Santika Indonesia Hotel was aiming to ensure as little disruption to normality as possible welcoming customers into their hotel, reducing the risk of infection and viruses for their customers and staff.

Following new protocol and measures, the hotel implemented Dycem Contamination Control floating mats to inhibit the growth of viruses and bacteria that may find its way into the hotel premises.

Ensuring cleanliness and avoiding copious amounts of waste, with Dycem Contamination Control products being used in the main lobby, reception areas and lifts, the Santika Indonesia Hotel is able to continue to function properly and continue to serve its customers to a top standard.

"We continue to give our commitment in order to serve our customers as best we can. Our new protocol includes using our new UK Manufactured Dycem Anti-Microbial mat to help inhibit any viruses or bacteria that present on the soles of the feet and the wheels of customer luggage."

Hotel and Resorts**

SHARED WORKPLACES

Shared Workplaces require safe operative hygiene procedures to ensure protection from risks that can be common in a grouped working environment.

It is vital that health and safety and cleanliness guidelines are followed to ensure workforces are able to control the risk of contamination throughout the facilities where shared working occurs.

Dycem Contamination Control Floor Mats and Push Pad Systems allow the opportunity for shared workplaces to be used safely, supporting a cleaner working conditions and supporting protocol when assessing risks in returning to work.

AREAS DYCEM BENEFITS

- ✓ Reception Lobbies
- ✓ Shared Lift Entrances
- ✓ Staircase Entrance/Exit
- ✓ Canteen Areas
- ✓ Shower/Gym Entry/Exit

CASE STUDY

JLL Facilities Team

Dycem CleanZone with demarcation zones to support social distancing measures were introduced at the Lobby area of one of the Managed Royal London Buildings. As a source of entry for all, it was also a source of cross-contamination risk due to the lift access to all multi-tenant levels.

The customised area supports a visual barrier and allows all users of the building to decontaminate wheels and footfall prior to entering the lift, within the lift itself for maximum floor protection against viral threats. Cleaned twice daily, the system provides communal support in the reduction of risk from outside and is aesthetically driven to support the requirements of the Facilities team.

"We sourced Dycem as a measure to support contamination Control at entry points. Our shared lobby area is very busy and the access to each level flows through this communal zone which posed a risk of cross-contamination. We are thrilled with the performance of the mats as they assure the safety and hygiene of the users of the building and facilitate the safe return to work due to their viral efficiency. We didn't realise how much risk there is at floor level"

JLL Facilities Team

CLINICAL SERVICES

By actively reducing the risk of contamination, Dycem Contamination Control Floor Mats and Push Pad Systems ensure critical effectiveness whilst assuring work safe solutions for Critical Services environments.

Having to embrace a new way for people who use services and ensuring the environment is safe to provide a fully functioning facility, Dycem’s Floor Mats and Push Pad systems ensure cleanliness protocols are met and functioning to the highest of standards.

AREAS DYCEM BENEFITS

- ✓ Dental Practices
- ✓ GP Rooms
- ✓ Care Homes
- ✓ Isolation Rooms

CASE STUDY The Woodlands Compounding Pharmacy

The Woodlands Compounding Pharmacy in Texas was previously using peel off/tacky mats but waste, cleanliness and size concerns raised the need for an alternative.

Our customisable system has been implemented into their receiving area and critical entrances.

“We are very satisfied. It is a great product that keeps all of our areas cleaner by controlling the contamination that can be brought in on shoes and wheels. The mats are also aesthetically pleasing and look professional. We see the most benefits in receiving due to the amount of dirt, controlled from the wheels of our large carts of goods.”
