

# Fluispotter®

Automated blood sampling  
made possible anytime,  
anywhere

## ABOUT

Fluispotter® is a compact wearable device that automatically collects blood samples on any animal. Fluispotter® is easily inserted in the jugular vein by your animal technician and then attached to a special designed casing, that enables the animal to move around freely in the pen.

## BENEFITS

- *Plug and play solution*
- *Small and wearable*
- *Automatic blood sampling technology*
- *Accurate timing and smart data log*
- *Works all hours (day/night)*
- *Stress-free sampling*
- *Group housing and freedom to move*
