

Upright wires separate objects from each other

Enrichment Wash Basket

Our innovative Wash Basket presents a straightforward solution for washing and autoclaving of various small objects.

The simple design generously accommodates multiple items while ensuring thorough coverage during both washing and autoclaving.

Inside the basket, the upright spacers ensure that items are adequately spaced apart, preventing any areas from being missed during the cleaning process.

Material: Stainless steel wire basket.

Dimensions: 486mm (L) x 236mm (D) x 209mm (H)
